

Unique DBM provides handling flexibility

RegenaVate® Formable DBM

Induces bone formation and facilitates bone growth

- RegenaVate Formable DBM allograft contains human demineralized bone matrix (DBM) and mineralized cortical cancellous bone chips in an inert porcine gelatin carrier
- The DBM is tested for osteoinductivity in a scientifically-proven in vivo rat assay
- Mineralized bone chips provide for osteoconductivity

Convenient and easy to use

- Available in two forms, Room Temperature (RT) and Frozen, to meet your personal preference
- RegenaVate Formable DBM, RT can be rehydrated and is available for use within 60 seconds
- RegenaVate Formable DBM Frozen is available pre-hydrated for convenience

Exceptional handling

- RegenaVate Formable DBM is formable into any shape at 45°C and is a resilient solid at body temperature
- Will not wash away during irrigation
- RegenaVate Formable DBM, RT allows the clinician to control DBM consistency: gel, paste, or putty

Simple handling and regeneration

Indications

RegenaVate Formable DBM is intended to be packed into bony voids or gaps to fill and/or augment dental intraosseous, oral, and cranio-/maxillofacial defects including:

- Extraction sockets
- Implant preparation/placement
- Alveolar ridge augmentation
- Sinus floor elevation
