

# Driva™ Drills Gold Series

## Usage Chart

For use with TSX®, Trabecular Metal®, TSV®, and Eztetic® Implants

Use a dry erase marker to track the total number of osteotomy preparations that are performed with each drill. It is recommended that reusable drills be replaced after 15 uses.\* Single-use drills must be disposed of after each procedure.

Time to Order New Drills

\* Single-use drills must be disposed of after each procedure. This chart is intended to be used as a reference guide only. The number of uses per drill will vary and depends on a variety of factors including bone density encountered, proper handling, and cleaning. Refer to Instructions for Use (IFU) for ZimVie Kits and Instruments (P-ZBDINSTRP) available at labeling.zimvie.com for complete cleaning and sterilization information.

NOTE: Surgical instruments are susceptible to damage for a variety of reasons including but not limited to: prolonged use, misuse, rough or improper handling, inadequate cleaning, etc. Care must be taken to avoid compromising the intended performance of the instrument.
